R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

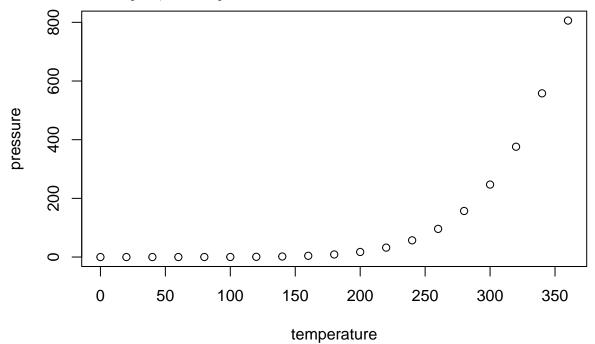

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

summary(cars)

```
##

                    Max.
                            :120.00
```

Including Plots

You can also embed plots, for example:

Note that the echo = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.

```
#code here
#USING VECTORS
#1 There is a built-in vector LETTERS contains the uppercase letters of the alphabet and letters which
## [1] "A" "B" "C" "D" "E" "F" "G" "H" "I" "J" "K" "L" "M" "N" "O" "P" "O" "R" "S"
## [20] "T" "U" "V" "W" "X" "Y" "Z"
letters
## [1] "a" "b" "c" "d" "e" "f" "g" "h" "i" "j" "k" "l" "m" "n" "o" "p" "q" "r" "s"
## [20] "t" "u" "v" "w" "x" "v" "z"
#a. You need to produce a vector that contains the first 11 letters.
first_11_letters <- LETTERS[1:11]</pre>
first_11_letters
## [1] "A" "B" "C" "D" "E" "F" "G" "H" "I" ".I" "K"
#b. Produce a vector that contains the odd numbered letters.
oddletters <-LETTERS[seq(1,26,2)]
oddletters
## [1] "A" "C" "E" "G" "I" "K" "M" "O" "Q" "S" "U" "W" "Y"
#c. Produce a vector that contains the vowels.
vowels <- LETTERS[c(1,5,9,15,21)]
vowels
## [1] "A" "E" "I" "O" "U"
#d. Produce a vector that contains the last 5 lowercase letters.
last_5_lowercase_letters <- tail(letters, 5)</pre>
last_5_lowercase_letters
## [1] "v" "w" "x" "v" "z"
#e. Produce a vector that contains letters between 15 to 24 letters in lowercase.
lowercase_letters <- letters[15:24]</pre>
lowercase_letters
## [1] "o" "p" "q" "r" "s" "t" "u" "v" "w" "x"
#2. Create a vector(not a dataframe) with the average temperatures in April for Tuguegarao City, Manila
  #a. What is the R code and its result for creating a character vector for the city/town of Tuquegarao
city <- c("Tuguegarao City", "Manila", "Iloilo City", "Tacloban", "Samal Island", "Davao City")
city
## [1] "Tuguegarao City" "Manila"
